

Product Description

Driller's Choice® Sodium Chloride Brine A

This material is a fully saturated liquid brine created from underground salt deposits by physical mining.

This material contains no additives.

Product Application

This product is intended for use in oil and gas well drilling and workover operations where clear fluids are not needed for pay zone protection and the downhole pressure is not too great for sodium chloride brine. Drilling fluids, are fully saturated with salt, will not be absorbed into or dissolve underground salt deposits during drilling.

This product is not approved for human or animal consumption and is intended for use only in chemical or industrial applications.

Methods of Analysis

Methods of analysis are based on ASTM E 534 and Cargill internal methods.

Producing Locations

This product is manufactured at Cargill Salt Cleveland, OH. Product of USA.

Physical Information

Driller's Choice® Sodium Chloride Brine A

PHYSICAL	TYPICAL
Water (%)	74
NaCl (%)	26
Hardness (as CaCO ₃) (ppm)	6500
pH	6.0-7.5

ATTRIBUTE	UNITS	TYPICAL
Saturation	Degrees	100
Weight per Gallon	Lbs.	10
Specific Gravity 60° F	g/cc	1.2
